

'Blackline' glass-in-glass bonded product range

A modern window with all the advantages of the well-known product system of TBGlazing. The frame of this type of window, including the sliding part - which is slightly shifted inwards - lies completely in the inner area of the vehicle. The outer pane with screen printing is only 5 mm on the wall. It provides an attractive optical effect with many design possibilities.

'Trapezium' sliding window

Square sliding window

Sliding part slightly shifted inwards.

Optional: set with steel bars.

'Blackline' glass-in-glass bonded product range

Sliding window (width x height)
